J C PATENTS, INC. 4 VENTURE, SUITE 250 IRVINE, CA 92618			EXAMINER DOUGLAS, STEVEN O	
			ART UNIT 3771	PAPER NUMBER
			MAIL DATE 08/07/2007	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/529,130

Applicant(s)

TAKANO ET AL.

Examiner

/Steven O. Douglas/

Art Unit

3771

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 June 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 4-10 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 4,5,7 and 9 is/are rejected.
- 7) ☒ Claim(s) 6,8 and 10 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

Claim Objections

Claims 4,5,7 and 9 are objected to because of the following informalities: - - does - - should be inserted before “not” (claim 4, line 4; claim 5, line 6; claim 7, line 5; and claim 9, line 5) in order to correct improper grammar. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4,5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pevzner'000 in view of Barclay'232.

The Pevzner reference discloses a hydrogen gas (i.e. cryogen-type) compression system comprising a source of hydrogen gas 10 having a gas feed line 18 with a modulating valve (unnumbered) that leads to the lower side of a heat exchanger 25 that is filled with liquid hydrogen from the source 10, wherein the gas is allowed to percolate up through the liquid hydrogen in the heat exchanger and hence cool the gas being feed to the compressor stages (30,36) and ultimately the gas feed outlets (44,46). Furthermore, a trim heater/cooler 40 (i.e. a broadly disclosed “*heat exchanger*”) is provided to further heat or cool the gas flowing through

Art Unit: 3771

the gas feed outlets (45,46) if needed. All functional and statements of intended use have been carefully considered but are deemed not to impose any structure on the claims distinguishable over the Pevzner reference which is most certainly capable of being used to fill a fuel cell associated with a gas powered automobile. However, the Pevzner'000 reference fails to disclose the broadly disclosed heat exchanger as being one which utilizes a liquid inert gas (i.e. that does not mix with the gas being supplied) as its heating/cooling medium. The Barclay reference discloses another cryogen-type gas delivery system comprising heat exchangers (26,36) that utilizes the liquid form of the cryogen gas being supplied as its heating and cooling medium to cool and/or heat the gas being supplied. It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute a heat exchanger system (i.e. one that utilizes the liquid form of the cryogen gas being supplied as its heating and cooling medium) as, for example, disclosed by Barclay for the broadly disclosed heat exchanger of Pevzner.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pevzner'000 in view of Barclay'232 as applied to claims 4,5 and 7 above and further in view of White'924.

The Pevzner reference discloses a hydrogen gas compression system (supra) that has an inherent method of operation, but does not disclose the system as being explicitly used for filling an automobile fuel tank or cell. The White reference discloses another hydrogen gas compression system configured to be used in filling fuel cells or tanks of alternative fuel vehicles. It would have been obvious to one of ordinary skill in the art at the time the invention was made to configure the Pevzner device to fill the fuel cell or tank of an alternative fuel

Art Unit: 3771

automobile in view of the implied teachings of the White reference to accommodate the filling of such alternate fuel-type vehicles.

Response to Arguments

Applicant's arguments with respect to claims 4,5,7 and 9 have been considered but are moot in view of the new ground(s) of rejection.

Claims 6,8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Steven O. Douglas/ whose telephone number is (571) 272-4885. The examiner can normally be reached on Mon-Thurs 6:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine Yu can be reached on (571) 272-4835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
